🗒 Skills

Tech Stack — Node.js, NextJS, React, *Javascript, Typescript,* TailwindCSS, HTML5, Python, Django, GraphQL, Git, MySQL, PostgreSQL, NoSQL, MongoDB, Redis, Docker, GCP, AWS, Github Actions, Gitlab CI/CD.

💼 Work Experience

Athena — 04/2024 – 12/2025
Platform Engineer
- Built and deployed HubSpot–EMS integrations automating employee lifecycle syncing, saving 50+ hours monthly and improving data accuracy by ~80%.
- Developed Node.js scripts using the HubSpot API to enforce 1:1 Deal–Ticket relationships, cutting CRM errors by 70% and enhancing reporting reliability.
- Architected the HubSpot→Workday integration framework with secure API payloads, OAuth2, and governance workflows, enabling scalable future automations.

TDi Sustainability — 04/2022 – 08/2023 | London, UK
Frontend Engineer
- Liaised with a team of 4 members to drive an enterprise app, catalysing client's digital shift; harnessed tech expertise for a 40% operational efficiency boost.
- Consulted closely with the design team, translating client vision into a tangible product.
- Owned the onboarding of 2 new team member, configuring the development environment, and expediting knowledge transfer; reduced ramp-up time by 50% for seamless integration.

IM Bank Group — 09/2021 – 01/2022 | Nairobi, Kenya
Frontend Engineer
- Collaborated with UX and product teams in an agile environment, driving high-quality, responsive interfaces that enhanced user engagement and satisfaction.
- Quickly adopted a new JavaScript framework(Backbase), contributing a pull request within the first 3 months of joining, accelerating project timelines and boosting team productivity.

GoodInfo Consulting — 02/2021 – 09/2021 | Nairobi, Kenya
Software Engineer
- Led the creation reusable React components, used in two features, cutting development time by 20% for enhanced user experience and swift feature delivery.
- Boosted frontend performance by 50% via Gatsby plugins, harmonising GraphQL and RESTful APIs. Achieved 30% faster page loading, enhancing user experiences.
- Orchestrated cross-functional collaboration among teams to promptly resolve customer issues, resulting in a 20% decrease in escalations and a 15% increase in issue resolution rate.

Voyage Control — 05/2019 – 04/2020 | London, England
Software Engineer
- Designed and implemented RESTful APIs that improved data access efficiency by 20%, resulting in a more responsive and user-friendly web application.
- Authored a client automated booking feature, reducing manual scheduling efforts by 60% and increasing customer satisfaction by streamlining the process.
- Applied advanced query optimization techniques within Django ORM, achieving a 30% reduction in database response times, improving application speed and scalability.

Andela 🔗 — 09/2018 – 10/2020 | Nairobi, Kenya
Associate Software Engineer
- Revamped account creation with Celery, achieving 25% faster activation. Applied technical expertise and collaborated for continuous small-team enhancements.
- Collaborated in small teams, reducing database response times by 30% and implementing optimizations for enhanced speed and scalability.
- Streamlined code review process, resulting in a 30% increase in development efficiency and faster feature delivery; recognized by team members for promoting a culture of continuous improvement and excellence.

🎓 Education

Jomo Kenyatta University Of Agriculture and Technology — 01/2012 – 12/2014 | Nairobi, Kenya
Bsc. Information Technology
